

PAIR YOUR E-CHARGER WITH ALEXA

IF YOU HAVE PREVIOUSLY LINKED ALEXA WITH OTHER DEVICES, GO TO STEP 4.

IF YOU HAVE NEVER LINKED ALEXA WITH OTHER DEVICES:

- ① Download Amazon Alexa app on your mobile device.
 - Sign in to your Amazon account (or create an account if you don't have one).

- ② Click on the 'Plus' button (at the bottom-right) and click on 'Add a device'.
 - Choose the device (it must be in configuration mode to be able to carry out the pairing).
 - Amazon Alexa starts searching for devices that are nearby.
 - Select the available device to pair with.
 - Afterwards, the app automatically detects the closest WiFi hotspots. Connect by choosing the WiFi network and entering the password.

- ③ Set up the Alexa device
 - Choose the language and the places where the device will be used.

- ④ Pair your e-Charger with Alexa
 - Press the 'Plus' button again, and select 'Skills and games'.
 - Select the magnifying glass (top-right) and type V2Charge.
 - Select the V2Charge skill and press the 'Permitir su uso' button. You are then redirected to the V2C Login page. Write the username and password.
 - Select the '+' button to add your e-Charger and then:
 - Write down the e-Charger ID number (found on the label).
 - Give your e-Charger a name. IMPORTANT: It must be a simple name. Example: 'Trydan', 'e-Charger', 'Garage e-Charger'.
 - Select the e-Charger model.
 - Finally, press 'Add e-Charger'.

You can now manage your e-Charger through Alexa.
