

# V2C Payments

Share your e-Charger with other users and get the maximum economic benefit.

# What is V2C Payments?

V2C Payments is a simple payment system available at V2C charging stations. It allows you to monetize your e-Charger by offering its use to other e-mobility users (valid with any charger with Cloud any charger with Cloud functionalities).

# How V2C Payments works?

Other users will be able to activate the e-Charger and pay for its usage in a simple way through their mobile device by following these steps below.

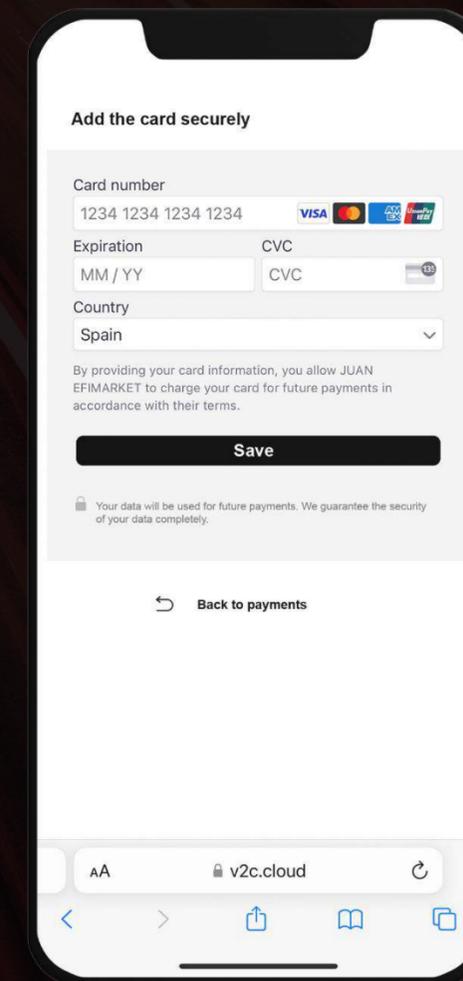

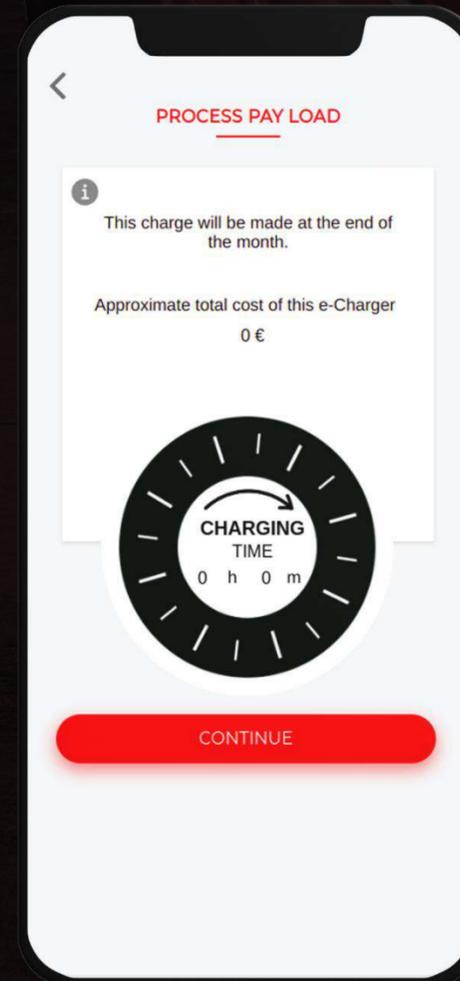

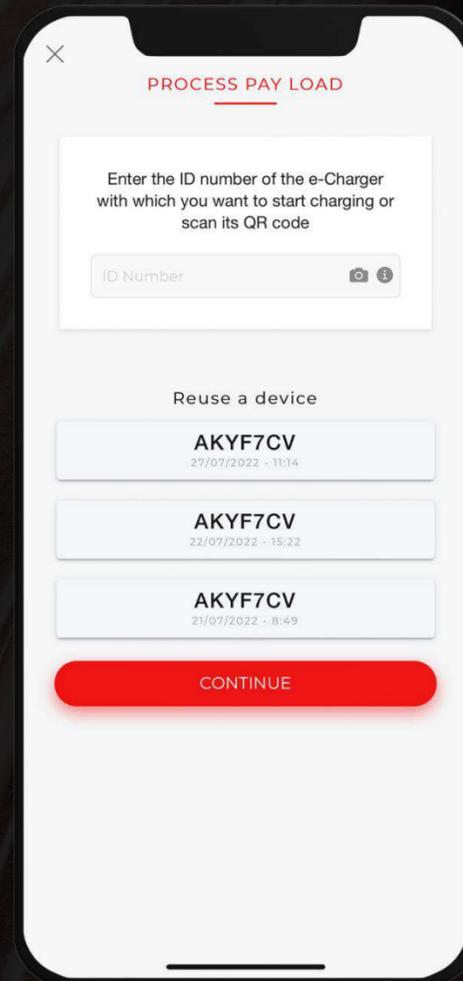

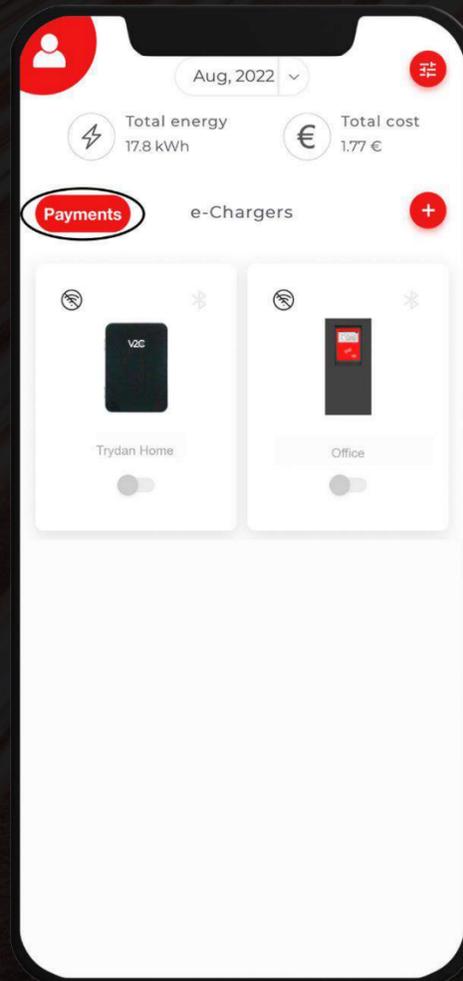

Step 1. Download the V2C APP.

Step 2. Access the Payments section.

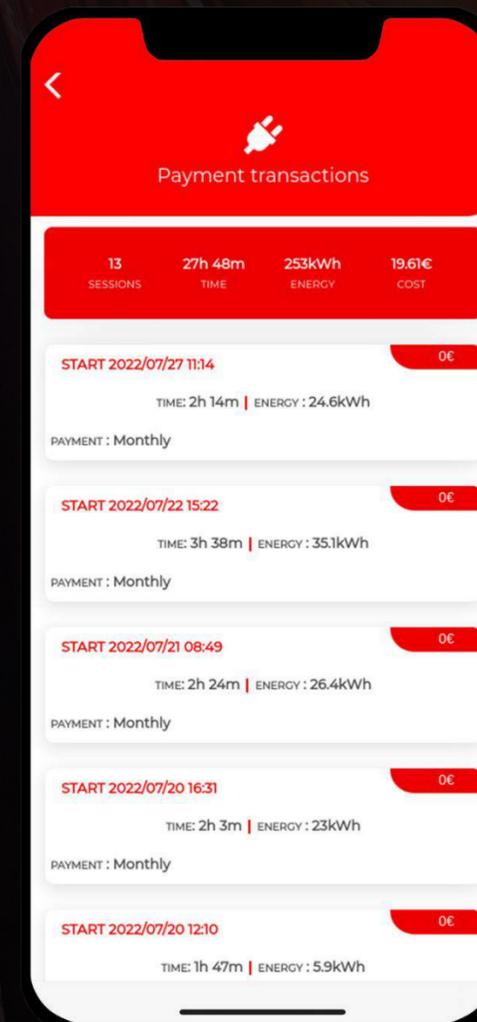

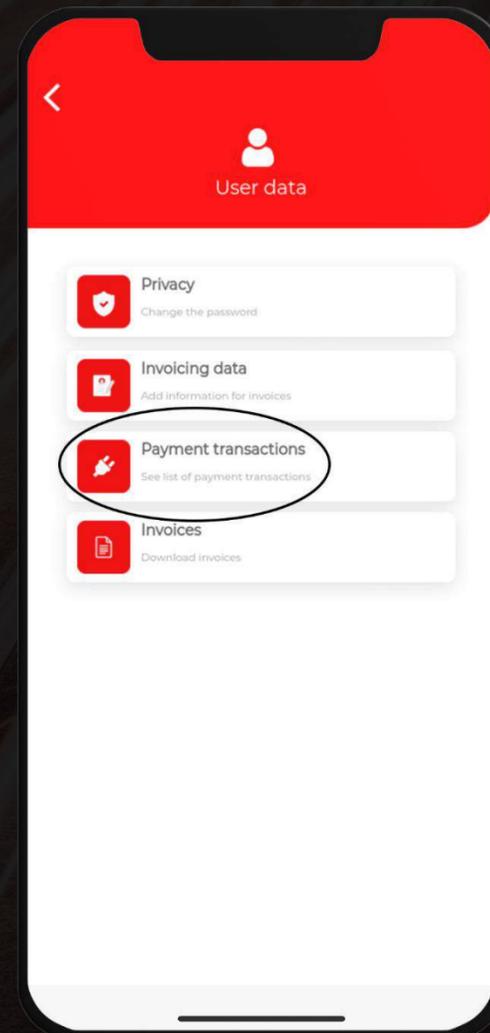

Step 3. Scan the QR code of the e-Charger or indicate the ID number (you can use old ones).

Step 4. Select the charging time, indicating the maximum price to the customer.

Step 5. Add the credit card or select an existing one already used.

The customer can view his charges as well as his payments and invoices.

# How does it work on the sponsor's side?

V2C Payments has no monthly cost for its use.

The sponsor (owner of the e-Charger) has full control of the charger through the web portal [www.v2c.cloud](http://www.v2c.cloud) and automatically receives in his bank the income from other users' charges.

Commissions per use:

**Stripe** is the secure payment gateway implemented. Más info: [www.stripe.com](http://www.stripe.com)

Commission: 1,4 % + 0,25 € per transaction.

**V2C** will charge a predetermined commission of 10% of the transaction amount.

Minimum transaction amount 0,50€.

Automatically the promoter will receive the money from the charges minus the commissions indicated above.

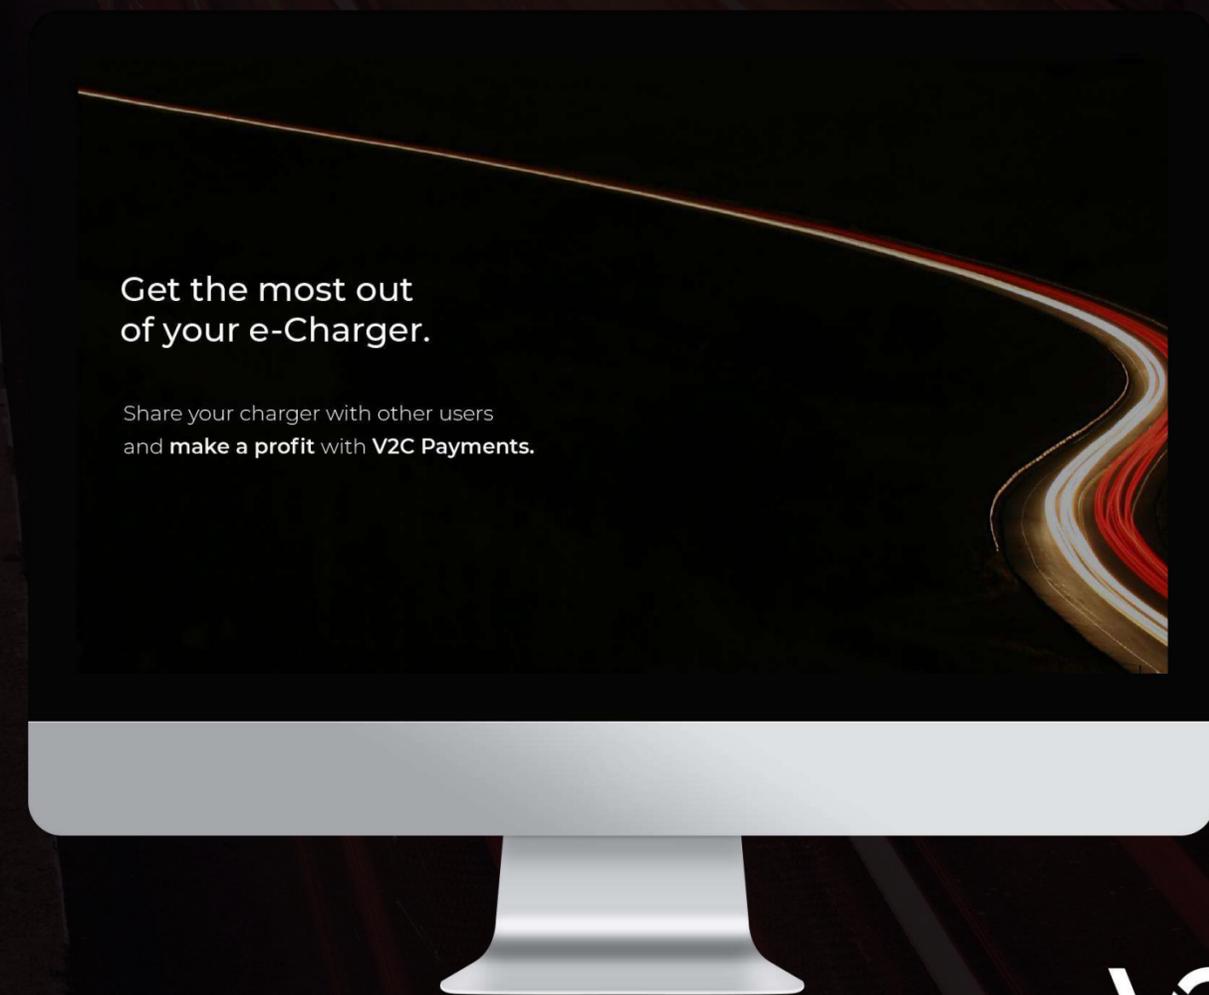

# Full control by the sponsor

The promoter will be able to control absolutely all its operation.

Access will be through the website [www.v2c.cloud](http://www.v2c.cloud)

Registration on the Stripe platform will be required.

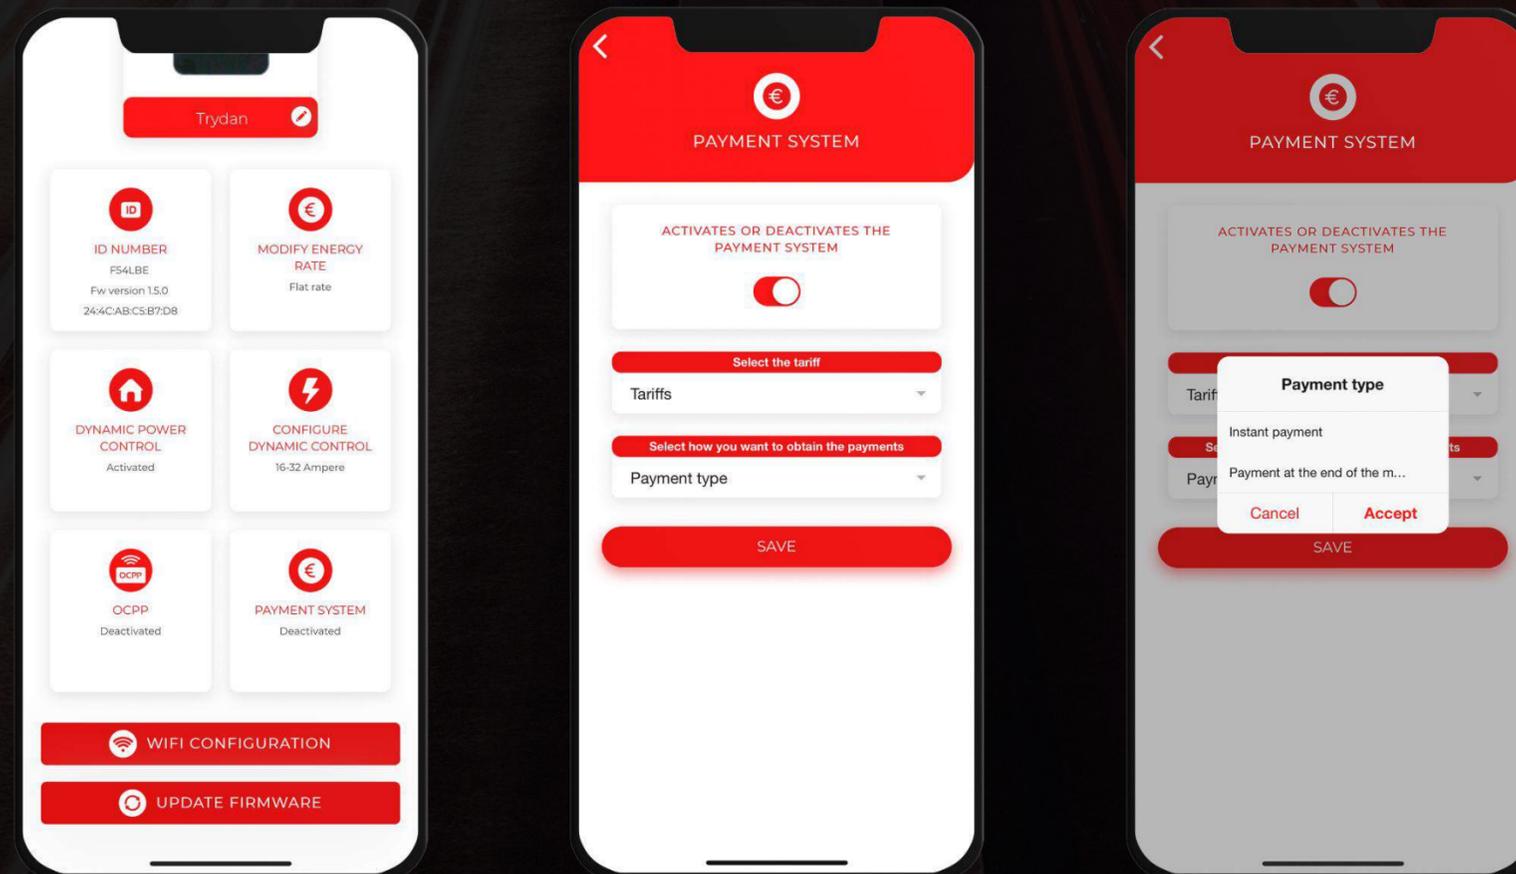

# Activate Payments mode in the e-Charger

V2C Payments can be activated through the web portal [www.v2c.cloud](http://www.v2c.cloud) or via the mobile app.

Step 1. Go to the e-Charger settings and select Payments.

Step 2. Activate the Payments mode.

Step 3. Select the rate and type of payment: instant or end of month.

# Collection methods

## **Charging at the end of the month**

All charges made during that month will be charged to the card selected by the customer.

## **Instant payment**

100% of the price indicated by the application is withheld from the customer and, once the transaction is completed, the rest of the amount is returned to the customer.

# Controlling the operation

You can configure the entire operation [www.v2c.cloud](http://www.v2c.cloud) once the Payments mode has been activated.

# Transactions

All transactions and their status.

The screenshot displays a web application interface for managing transactions. On the left is a dark sidebar menu with the following items: e-Chargers, Global statistics, Users, Support, API key, Payments (highlighted), OCPP, Smart charging, and Sign off. The main content area is white and features a navigation bar with tabs: Transactions (selected), Income, Tariffs, Invoices, Invoicing data, User information, and Disconnect account. Below the navigation bar, there are date pickers for 'Since' (2022-07-25) and 'Until' (2022-08-08), and a 'Download data' button. The main part of the interface is a table with the following columns: Datum, Device Name, Customer, Tariff, Energy, Time, Amount, V2C, Stripe, To receive, State, and Payment type. The table contains 9 rows of transaction data, with a total of 9 transactions indicated at the bottom.

# Transactions

Rates: design your own rates.

The screenshot displays the V2C web application interface for managing tariffs. The sidebar on the left contains the following menu items: e-Chargers, Global statistics, Users, Support, API key, Payments (highlighted), OCPP, Smart charging, and Sign off. The main content area is titled 'Tariffs' and includes a navigation bar with tabs for Transactions, Income, Tariffs, Invoices, Invoicing data, User information, and Disconnect account. A 'Add tariff +' button is located at the top left of the main content area. Below it is a table with the following columns: Name, Active devices, and Delete tariff. The table contains three rows of tariff information:

Name	Active devices	Delete tariff
 Solo kwh	Aldaia xirivella 2	<a href="#">Delete</a>
 Solo euro/hora		<a href="#">Delete</a>
 Tarifa gratuita	Xirivella	<a href="#">Delete</a>

Below the table, it indicates '3 total' tariffs. At the bottom, there is a 'MAINTENANCE FEE (€)' input field with the value '1' and a 'Save' button.

# Transactions

Rates: design your own rates.

The screenshot shows a web interface for configuring tariffs. On the left is a dark sidebar with navigation items: e-Chargers, Global statistics, Users, Support, API key, Payments (highlighted), OCPP, Smart charging, and Sign off. The V2C logo is at the bottom left of the sidebar. The main content area is white and contains a form for selecting a tariff. At the top right of the main area is a language selector set to 'English'. The form has a title 'Select your tariff' with an information icon. Below it is a dropdown menu currently showing 'Flat rate' and a 'Save tariff' button. A second section contains a 'Tariff name' input field with the placeholder 'Name of tariff' and a note: '\*Maximum values allowed: Kwh: 1.50 €/h: 4'. Below this is a prompt: 'Please indicate the price of your Flat Rate (€/kwh) and (€/h)'. At the bottom of this section are two input fields: '€/Kwh' with the value '0' and '€/h' with the value '0'. The V2C logo is also present at the bottom right of the main content area.
