

INDICATIONS OF LED COLOURS E-CHARGER TRYDAN

The V2C logo on the front of the e-Charger lights up according to the charging status:

White: Vehicle is not connected.

Dark blue flashing: the vehicle is charging.
The speed of the flashing is directly related to the intensity of the charge.

Light blue: timer activated, i.e. a charge is programmed.

Green: vehicle charging is complete.
Green flashing: the charger is correctly connected to the Wifi network.

Red: Error 1: Message.
Error 2: Communication.

Yellow: Control Pilot Error (car communication error).

Pink: the e-Charger is being updated.
