CHARGING UP

YOUR TOMORROW

THE FUTURE OF E-MOBILITY, TODAY.

TRYDAN. An unique e-Charger: hyperconnectivity and maximum efficiency

Trydan raises the charging experience to the next level. You will discover a new concept of e-Charger: the most innovative and smartest known so far.

A revolutionary design with an avant-garde style bringing elegance and functionality. This is the first charger on the market integrating electric protections inside itself, which bring design and beauty on the installation space.

Have you ever imagined command “Alexa, start charging my electric car”? Your voice submits orders on the charge and Alexa executes them. With Trydan, it is possible, thanks to the application of the latest developments in connectivity with smart devices.

Easy and fast installation: the electric protections are inside of the charger.

Carefully designed to get the best output from the energy produced by solar panels thanks to the dynamic power control integration.

Free access to V2C Cloud app: control and schedule the charge, check statistics and learn the cost of all charges from your smartphone, computer or tablet.

V2C Cloud has an open API: it allows access for professional developers.

Enjoy the greater comfort thanks to the compatible connectivity with "Alexa".
