CHARGING UP

YOUR TOMORROW

POLE PRO. The smartest and most profitable charge sharing solution.

Pole Pro integrates the latest technology to offer the most efficient charging for multiple users in public and private spaces.

Pole Pro features an elegant, robust design and the best connectivity for the most demanding environments in its two versions, floor or wall.

With Ethernet connection and new 4G integrated, Pole Pro allows you to enjoy a safe and guaranteed secure charging. The LED lights on the connectors and a design display are able to report the charging status in real time.

The e-Charger has a dynamic charge management system to adapt the maximum available power and avoid overcharging.

Thanks to its advanced technology, the use of the charger by multiple users has never been easier. Pole Pro allows the connection by using RFID cards and the free V2C Cloud app. It has an easy payment system named V2C Payments.

POLE PRO

CHARACTERISTICS

It has an integrated MID meters to identify in real time the energy usage of the installation.

Fully adaptable: floor or wall version and can be configured with 1 or 2 sockets and 1 or 2 hoses.

Pole Pro has the possibility to balance the maximum power between the two sockets or between several e-Chargers equally to ensure safe charging.

Consult and download the history of uploads made by all users through the multi-platform V2C Cloud app.

FULL CONNECTIVITY

Pole Pro has Ethernet connection, integrated 4G, RFID reader, OCPP&XML and access to the V2C Payments platform to manage payment for multiple users.
