YOUR TOMORROW

TRYDAN PRO.

The perfect evolution.

Trydan Pro offers advanced authentication, connectivity and maximum stability. Experience total control thanks to instant access to the Internet, stable connection and secure reloads by multiple users.

The inclusion of RFID and NFC technologies makes Trydan Pro the e-Charger par excellence for public-private businesses or private use spaces. It identifies users and manages their payments easily.

Trydan Pro has 4G technology with SIM card included to enjoy instant Internet access.

But its connectivity goes much further. The e-Charger has an Ethernet connection to ensure uninterrupted connectivity even in environments without coverage.

TRYDAN PRO

CHARACTERISTICS

RFID/NFC reader

Accurately identifies multiple users, ensuring an accessible and secure charging experience.

4G technology with SIM card included

Connected to the Internet quickly and conveniently thanks to 4G technology with SIM card included.

Full Ethernet connectivity

Enjoy uninterrupted connectivity even in areas without coverage thanks to the network cable connection.

WITH ALL THE POTENTIAL OF TRYDAN!

Enjoy unique PV integration, connectivity to smart devices and dynamic power control. See the loads of all users on the cross-platform **V2C Cloud** app and manage your payments from **V2C Payments**.
